Washington, DC 20554

Re: *3.5 GHz SAS and ESC Applications; Proposal of CTIA for Certification as a  
SAS Administrator and ESC Operator, GN Docket No. 15-319.*

Dear Ms. Dortch,

On November 7, 2016, CTIA received a request from the Wireless Telecommunications Bureau and Office of Engineering and Technology of the Federal Communications Commission ("Commission") asking CTIA to update its application to become a Spectrum Access System ("SAS") Administrator to clarify the process for federal agencies to seek redress of interference complaints or other requests relating to the operation of the CTIA SAS.

CTIA hereby takes this opportunity to amend its application to add the following text on page 4 of our supplement at the end of our answer to question 7<sup>1</sup>:

"CTIA understands that federal entities will not necessarily provide written requests when asking the CTIA SAS Administrator to comply with requests relating to operation of the SAS. CTIA also acknowledges that federal entities are not required to provide the CTIA SAS Administrator a written request regarding interference complaints. (See 47 C.F.R. §§ 96.53(o); 96.63(l)-(m))."

---

<sup>1</sup> See Letter to Brian Regan, FCC, from Paul Anuskiewicz, CTIA, GN 15-319 (Sept. 27, 2016).

Pursuant to Section 1.1206 of the Commission's rules, a copy of this letter is being filed in ECFS. Please do not hesitate to contact the undersigned with any questions.

Sincerely,

/s/ Paul Anuszkiewicz

Paul Anuszkiewicz

Vice President – Spectrum Planning
